---

I am a forward-thinking Data Scientist who uses curiosity, emotional intelligence, innovation, and efficiency to tell stories with data. My background as an earth scientist and project manager allows me to deliver value through efficient processes, enthusiastic stakeholder engagement, and resourceful expertise. I love applying the scientific process to solve real-world problems and have a positive impact on the team and organization while I'm at it. One can gather from my varied experiences that I'm not afraid to try new things; I've become skilled at adapting, learning, and improving along the way.

## Technical Skills

**Skills:** Data Analysis, Data Visualization, Data Cleaning, Web Scraping, Supervised and Unsupervised Machine Learning (ML), Time Series, Natural Language Processing, Image Classification, Bayesian Statistics, Tableau, A/B Testing

**Python Libraries:** Pandas, NumPy, SciPy, Matplotlib, Seaborn, Scikit-learn, Natural Language Toolkit, Beautiful Soup, Keras, Tensorflow

**Machine Learning Models:** Linear Regression, Multiple Linear Regression, Support Vector Machine Regressor, DBSCAN, Decision Trees, Adaboost, Random Forest, Extra Trees, K-Nearest Neighbor, K- Means, Convolutional Neural Networks, Recurrent Neural Networks GBM, XGBoost, Voting Classifier, ARIMA/SARIMA, Naive Bayes

**Languages / Software:** Python, SQL, Bash, Scala, Jupyter Notebook, Microsoft Office, Databricks

## Project Management Skills

Project Management Professional (PMP) Certification: License #1956892

October 2016 - Present

Lean Six Sigma Yellow Belt Certification

December 2018 - Present

## Leadership Skills

[EnergyTechHub](#) Board Member

November 2019 - Present

## Data Science Projects

Forecasting Induced Seismicity in the Eagle Ford Shale Play

- Utilized the USGS and TexNet Seismicity Catalogs to understand earthquake occurrence and driving mechanisms
- Used RNN, ARIMA, and SARIMA models to forecast seismicity occurrence
- Found preliminary correlation between hydraulic fracture injection volume per foot lateral to induced seismicity

Trained Convolutional Neural Network to Diagnose Presentation of COVID-19 and Viral Pneumonia in X-Rays

- Collaborated with three other data scientists to develop highly predictive model
- Utilized Kaggle Dataset of X-Ray images to train Keras CNN model
- CNN Model test accuracy: 95%, Recall score of 95%
- Created an end-user interface to interact with the trained model using Flask

Natural Language Processing Binary Classification for Game of Thrones vs Lord of the Rings Subreddits

- Used PushShift API to scrape r/GoT, r/LOTR subreddit posts
- Used Naïve Bayes and Random Forest models to create a Natural Language Processing Model
- RandomForest was the best model achieving 93% accuracy, 91% sensitivity using TF-IDF Vectorizer
- Visualized model statistics comparing TF-IDF vectorizer against CountVectorizer

Scotch Whisky Recommender App Using K Means Clustering

- Used Kaggle dataset of scotch whisky distilleries to compare flavor profiles and explore grouping options
- Utilized K Means Clustering and the elbow method of inertia/silhouette score comparison to determine optimum number of clusters for grouping distilleries
- Compared/QC'd clusters using Radar/Spider plots for visual comparison of flavor profiles
- Created App hosted on Streamlit to provide scotch/distillery recommendation based on user preference of either flavor profile or known distillery.

## Professional Experience

- Data Science Immersive Student  
General Assembly  
December 2020 - March 2021  
Denver, CO
- Followed machine learning curriculum and built supervised and unsupervised machine learning models
  - Worked on a team of four other data scientists on a project to diagnose COVID-19 lung infection in x-rays
  - Was challenged to create five projects using various machine learning models in a time-limited manner
- Eagle Ford Shale Play Asset Geophysicist  
BP/BPX Energy  
March 2019 - October 2020  
Denver, CO
- Geoscientist/Geophysicist responsible for providing data-driven insight to reduce well deliverability risk for a 4-6 rig drilling program
  - Advised multi-disciplinary team of geologists and engineers on the benefits and appropriate uses of 2D/3D seismic datasets for optimizing hydrocarbon production
  - Delivered a data reprocessing and interpretation project worth ~\$100k that improved hydrocarbon valuation in an undeveloped play
  - Facilitated completion and organization of newly acquired 3D seismic data worth ~\$15million+
  - Assisted Asset VP in Process Improvement efforts for Eagle Ford BU to optimize team efficiency and Capital Planning Process, reducing software touch points and man-hours
- Project Coordinator  
ESG/Spectraseis  
February 2017 - March 2019  
Denver, CO
- Project Coordinator/Manager responsible for delivering 30+ awarded Passive/Induced Seismicity projects, ranging from \$10k-100k in value, following the company's Project Management Processes
  - Responsible for project planning and execution, coordinating operational logistics, meeting technical and contractual obligations, process integration and improvement, and client communication
  - Integrated newly acquired business and service offering, Spectraseis, into parent company's (ESG) process
  - Developed and adapted ESG's Project Management Process to fit Spectraseis' Seismicity service offering, increasing efficiency and profitability during BU integration
- Geophysicist/ Geoscientist  
BP America, Inc  
August 2012 - March 2016  
Houston, TX
- Geoscientist/Geophysicist for the Deepwater Gulf of Mexico, Wyoming, Anadarko, and Arkoma BU's responsible for mapping the subsurface on both 2D/3D seismic data to assist teams in optimizing hydrocarbon production
  - Led the successful acquisition and delivery of a new 3D seismic dataset worth ~\$20million to the Anadarko BU
  - Led the Deepwater Gulf of Mexico team to drill a \$130million exploration well with operational partner Exxon
  - Delivered Technical Seismic Fitness and Futures Report with recommendations for past and future dataset potential for the Wyoming asset that provided foundation for identification of additional plays in the mature/legacy asset
  - Led a team to conduct technical analysis and provide recommendation to management against participation in a competitor's \$200 million exploration well, successfully avoiding a (very expensive) dry hole
  - Recommended for the Leadership Development Program in 2013; completed the Courageous Conversations and Effective Planning Courses as part of this program

## Education

- Data Science Immersive Advanced Certificate | General Assembly  
Master of Science in Geoscience | University of Arizona  
Bachelor of Science in Geoscience, Minor in Mathematics | The University of Arizona
- Grad year: 2021  
Grad year: 2012  
Grad year: 2010
